SUCCESS CASE

Transforming Continuing Education in a Premier Hospital Network

THE CHALLENGE

A renowned hospital network (top-3 ranked by U.S. News) sought to streamline its cumbersome, manual continuing education (CE/CME) management processes.

THE SOLUTION

A renowned hospital network (top-3 ranked by U.S. News) sought to streamline its cumbersome, manual continuing education (CE/CME) management processes. While some clinicians had extensive staff support to manage CME, others were left to manage this themselves. The network wanted to remove that administrative burden and cost for both admins and providers.

THE OUTCOME

- **Streamlined Processes:** Assured state-specific CE compliance for staff with multiple licenses in one system.
- **Significant ROI:** \$4,950 average savings per supervisor with 110 hours moved toward more impactful non-admin work.
- **Elevated Compliance:** Achieved upwards of 98% confirmed CME compliance and 100% successful audits.

Impact

This case study exemplifies how embracing digital transformation with the CE App can lead to significant improvements for your staff and providers, ultimately helping you deliver better care.

Testimonials

- // Our clinicians constantly praise your support team!

Compliance Manager

- // I manage CME with ACEA to save physicians time and send them the CME they need.

Dept. Credentialing Manager

- // This is excellent, exactly the breakdown I want

Clinician User

\$4,950

Direct value saved per supervisor

98%⁺

Confirmed CME compliance
